With Stanford University roots, ReSurge International pioneered the first efforts to bring reconstructive surgery to developing countries in 1969.

ReSurge builds surgical capacity and provides reconstructive surgeries for those in developing countries who suffer from disabling injuries or congenital anomalies, such as cleft lips and palates, burns, hand injuries and other conditions.

ReSurge focuses on training the next generation of reconstructive surgeons to increase access to sustainable, high-quality care.

It renews the health of approximately 3,000 children and adults each year so they can go to school, provide for their families, and contribute to society.

Local, developing world surgical teams, which ReSurge trains and supports, perform most of those surgeries.
RESURGE IN FY2015

- 2,960 patients treated
- 317 medical professionals taught
- 85% surgeries performed by developing world partners
- 13 countries on four continents served
- 10,599 hours donated by medical volunteers
- 5,184 surgeries performed

FY2015 is July 1, 2014 - June 30, 2015

Photo by © Jeffrey Davis
**WHAT WE DO**

**ReSurge Programs**

ReSurge programs deliver essential and high-quality surgical care to those who need it most. Through these programs, ReSurge aims to strengthen the surgical workforce and safe surgery in the developing world.
Surgical Outreach Programs

ReSurge’s international surgical teams, working year-round in their low- and middle-income countries, provide 85 percent of our surgeries. By training and supporting local surgeons to help those living in poverty in their communities, ReSurge provides sustainable year-round care in eight countries – the most cost-effective and efficient model to deliver treatment.
Team Trips

In geographies where there are few surgeons and little or no access to care, ReSurge surgical volunteers donate their time to train local medical professionals and provide surgical care. In FY15, 123 volunteers traveled to Bangladesh, Bolivia, Cambodia, India, Nepal, Nicaragua, Peru and Vietnam.
Why We Provide Surgical Care

Five **billion** people lack access to safe and affordable surgical care. Children and adults in low-income countries are hit the hardest by this disparity, with the poorest third of the world receiving only 6 percent of all surgeries.

Without access to safe surgical care, millions of needless deaths and disabilities occur. Those living in poverty are often forced to live with debilitating injuries or congenital anomalies. They are unable to work, go to school, feed themselves or provide for their families.

By providing reconstructive surgical care in underserved areas of the world, ReSurge restores function and transforms lives.

To learn more about ReSurge’s impact in improving lives, [read Rifat’s story](#).
ReSurge Global Training Program

ReSurge focuses on building surgical capacity and training to increase the skills and services needed to treat local populations, and thereby transforming exponentially more lives. Our ReSurge Global Training Program (RGTP) is a comprehensive strategy to train the next generation of humanitarian reconstructive surgeons.
ReSurge Global Training Program: Academic Faculty and Curriculum

ReSurge has engaged faculty from leading academic institutions around the world to create customized curriculum components based on local epidemiological needs and capacity of the health care workforce. The result is a 50+ module training curriculum that covers all of reconstructive surgery - cleft lip and palate, hand, burn and general reconstruction.
ReSurge Global Training Program: Visiting Educators

Trainees from overseas sites are identified and enrolled in the RGTP to assess progress toward proficiency and expertise in key procedures. ReSurge links the world’s leading experts, experts - from institutions like Harvard, Johns Hopkins and Stanford - as Visiting Educators, with promising young surgeons in our partner programs. In FY2015, ReSurge’s Visiting Educators provided nearly 1,300 hours of specialized training for 317 medical professionals, including one-on-one training for more than 70 surgeons throughout the developing world.
Why We Provide Surgical Training

ReSurge provides advanced surgical training for medical professionals in developing countries to increase the accessibility of safe surgical care and to help address local surgical workforce challenges. Training and empowering the next generation of humanitarian reconstructive surgical teams enables year-round access for exponentially more patients in need and is the most efficient and cost-effective way to deliver care.

Global Surgery Milestones:
ReSurge Speaks at U.S. Congress and United Nations

New evidence and advocacy asserting that access to safe surgical care reduces premature mortality, avoidable disability, and economic and social disparities have put global surgery on the public health agenda for the first time in history.

- In February, at the request of the Congressional Global Health Caucus, ReSurge International and the Global Alliance for Surgical, Obstetric, Trauma, and Anesthesia Care (G4 Alliance) led the first congressional briefing on the tremendous need for surgery globally.
- In March, the World Bank released its Disease Control Priorities Report (DCP3), which stated that “surgical procedures are among the most cost-effective of all health interventions in the developing world.”
- In April, The Lancet Commission on Global Surgery reported that 5 billion people lacked access to surgical care and urged global leaders to invest in capacity. Furthermore, the commission found that the cost of scaling up surgical capacity is $350 billion; the cost of not investing is $12.3 trillion in lost productivity and GDP due to untreated surgical condition.
- In May 2015, the World Health Assembly recognized that surgical care and anesthesia are critical in achieving universal health coverage, unanimously passing a resolution, representing support from 194 countries.
- In September, the United Nations passed the Sustainable Development Goals or post-2015 Global Goals, which are not achievable without the inclusion of global surgery.

These recent publications and events provide a strong evidence base and a compelling argument for investing in surgical care as a cost-effective strategy for strengthening health systems, relieving human suffering and increasing economic productivity. All magnify the importance of increasing access to surgical care and ReSurge’s work.
Nepal Earthquake Response and Recovery

On April 25, 2015, we awoke to the horrible news that Nepal had been devastated by a 7.8 earthquake. ReSurge, with our 50-person year-round Nepal team, responded immediately, caring for hundreds of the wounded with emergency care and major surgery.

We doubled our capacity - hospital beds, operating rooms, surgical staff - to respond to the disaster. ReSurge reinforced our local team’s efforts by sending in medical volunteers, supplies, advanced training in microsurgery and more. We were able to help so many so quickly because ReSurge, with your help, had invested in medical training and building surgical capacity for years.

Our investments helped build the largest reconstructive surgery team in Nepal - with nine of the country’s 16 plastic surgeons. Because of those investments, ReSurge’s year-round Nepal team was well-equipped to respond to the worst natural disaster to strike Nepal in decades - and continues to help provide reconstructive surgery for the injured during the recovery.

ReSurge is extremely grateful to the ReSurge Nepal Team, Phect-Nepal our local NGO partner, AmeriCares for donating nearly $1 million in medical supplies, and so many others who helped us assist the injured in their time of need.
Leadership Transition

After a distinguished 19-year career as ReSurge president and CEO, Susan W. Hayes retired and was succeeded by Jeff Whisenant on July 1.

When Hayes joined ReSurge, then known as Interplast, in 1996 the organization’s role was to provide surgical care and medical services to poor people in developing countries. Under Hayes’ guidance, ReSurge expanded its focus to include adding surgical capacity in those countries, and also training the medical professionals who staff those facilities year-round. Today 85 percent of its surgeries are performed by surgical professionals who live in the developing world but have the benefit of ReSurge training, oversight and support. This model has proven to be the most efficient, cost-effective and culturally appropriate way to deliver care.

Whisenant brings to ReSurge more than 25 years of experience providing executive leadership in international relief. Most recently he was an executive vice president at Lutheran World Relief, a Baltimore-based NGO that works to provide solutions to international poverty and injustice.

“I’m excited to join ReSurge, an organization that meets such a vital need in the world,” Whisenant said. “Susan has done a fine job of building the organization. It’s humbling to take the reins from such an inspiring leader and a privilege to serve with so many dedicated volunteers, supporters and international partners.”

Medical Volunteers & Translators FY2015

Incredible medical volunteers help make our work possible. ReSurge volunteers donate their time, travel around the world, work under exhausting circumstances and give up pay, vacation and comfort to build surgical capacity and to help transform the lives of patients and their families. Volunteers are integral to our objective of creating long-term, sustainable surgical care around the world.

Ronald McDonald House Charities (RMHC) selected ReSurge as one of nine nonprofit organizations to receive grant funding specifically to improve the health and well-being of children around the world. The RMHC grant to ReSurge is to support the organization’s advanced surgical training initiative in Vietnam. As a result of the grant, the country will have expanded surgical capacity and more than 5,000 children will receive surgical care. ReSurge remains enormously grateful for RMHC’s partnership since 1987.

www.rmhc.com
AmeriCares is a nonprofit disaster relief and global health organization providing immediate response to emergency medical needs and supporting long-term health care initiatives for people in the United States and around the world. The organization partnered with ReSurge and donated more than $800,000 of urgently needed medical equipment and supplies to the ReSurge Nepal surgical team, following the devastating earthquakes in April and May 2015.

www.americares.org
Smile Train, a partner with ReSurge since 1999, is an international children’s charity with the stated belief that every child born with a cleft anywhere in the world - should have the opportunity to live a full and productive life. We couldn’t agree more and are grateful for the funding Smile Train provides ReSurge each year to enable our international medical partners to transform the lives of nearly 2,000 cleft patients each year with the power of a smile.

www.smiletrain.org
The Long Island Plastic Surgical Group (LIPSG), the largest and longest-running private academic plastic surgery practice in the United States, recently has partnered with ReSurge International to establish the ReSurge | Long Island Plastic Surgical Outreach Program in Ecuador. With financial assistance and expert surgical training from LIPSG, the Ecuador outreach program, already well established under the leadership of ReSurge International Medical Partner Dr. Jorge Palacios, will be further strengthened to improve the skill level of local providers and to ensure quality reconstructive surgical care is available to children and adults in need throughout Ecuador. www.lipsg.com
RealSelf, a global online community for learning and sharing information about cosmetic surgery and other elective treatments, got a firsthand look at the impact of reconstructive surgery in developing countries in 2014 when they sponsored ReSurge's volunteer surgical team trip to Quy Nhon, Vietnam. Moved by the impact of ReSurge's work, they increased their commitment got a firsthand look at the impact of reconstructive surgery in developing countries in 2014 when they sponsored ReSurge's #Change500 campaign, which successfully provided life-changing surgical care for another 500 children and adults.

ReSurge greatly appreciates our partner Barco’s Nightingales Foundation and its founders Michael and Frida Donner for their outstanding commitment and investment in our work. Their foundation is the philanthropic arm of Barco’s Uniforms, a producer of medical and other uniforms. The Foundation focuses on helping children in need while highlighting the role that nurses play in providing medical care. Since first partnering with ReSurge in 2009, Barco’s Nightingales Foundation has helped ReSurge change 3,000 lives.
